

Define the Problem Statements

Date: 18 June 2026
Team ID: Banka Akshay Kumar Reddy
Project Name: ShopEZ (E-Commerce Platform)

Problem Analysis

Understanding the core challenges faced by our dual user base—the shoppers and the store administrators—is crucial for delivering a platform that genuinely adds value.

Problem Statement (PS)	I am (User Persona)	I'm trying to	But	Because	Which makes me feel
PS-1	A modern online shopper	discover products quickly, manage my cart effortlessly, and complete checkout smoothly	many competing websites are noticeably slow, difficult to navigate on mobile, or visually unappealing	they rely on bloated, outdated frameworks and fail to prioritize modern UX expectations like dark mode	deeply frustrated, often causing me to abandon my shopping cart and switch to a competitor.
PS-2	A store administrator	manage my product inventory, update pricing, and fulfill customer orders efficiently	my existing administrative tools are clunky, disconnected from the storefront, and have a steep learning curve	they require entirely separate legacy software or complex third-party integrations	overwhelmed, prone to making inventory errors, and less productive throughout the workday.
